FR label

material specifications

Overview

Our SAF-T-SLEEPER FR II Inverted Seam/ Anti-Bed Bug mattress offers the maximum in comfort and safety in our dormitory line. This mattress comprised of 5 layers of quilting and padding surpasses the most recent Federal standards for open flame safety – no fire retardant chemicals are used to meet the FR requirements. The 210 denier nylon bed bug resistant outer cover is a breathable, soft and comfortable polyurethane-coated nylon fabric that is PDBe and PVC free and will not crack or become brittle over time. Warm soapy water is recommended for proper cleaning to protect the longevity of the cover. This mattress is antibacterial/anti-fungal, antimicrobial, odor free, anti-static, fluid proof, crack resistant, odor free, flame retardant and non-allergenic. The cover is constructed using inverted seams with a Locking zipper closure – making the mattress anti-bed bug. The edge support is a 6 gauge border rod secured to the outer row of perimeter coils by helicals to prevent premature breakdown. All sides are completely enclosed with adequate padding so that no sharp edges or coils can be felt through the sides. The quality of the SAF-T-SLEEPER FR II coupled with the benefits of enviro-friendly BioFlex™ foams make this mattress the perfect choice for the "Green" concerned consumer. The use of BioFlex™ foams improves the foams core structure, creating a more supportive, resilient and comfortable sleep surface.

Safety

Meets Cal 129, TB603, CFR1633, CFR 1632

Coils

Innerspring 364 coil (exceeds GSA 312 standard)
Border Rod 6 gauge
12.75 gauge Bonnel

Mattress Pad

FR insulator/cotton combination pad – 4.5 oz

Border

210 Denier Nylon border

Foam

½" BioFlex™ sheet foam
