

EVOLVE

by  RT LONDON®

By re-imagining the standard bed frame, Evolve loads functionality into the headboard making use of the often underutilized vertical space. A system of headboard accessories including storage, work surfaces and panels work in tandem with an accompanying lounge collection to offer students a completely reconfigurable suite. Evolve is designed to accommodate many work styles and social modes.

*Evolve is patent pending

Evolve offers **adjustable** height headboards which allow the bed to be adjusted to 19 different deck heights on the studio bed and 7 deck heights on the single bed.

Constructed using an exposed multi-ply, decorative edge core with maple or oak face veneers, Evolve offers the **durability** required in a residence hall.

The wardrobe can **stack** on top of the 3-drawer chest, or the 3-drawer chest can stack two high to use the most vertical space and create privacy in the room.

Work YOUR way with an adjustable worksurface to find the perfect height.

Organize and reduce clutter of small items with modular cubbies.

Hide your stuff under your bed with the rolling storage cart. Fits 4 side by side under the bed.

Hang items off the enhanced stabilizer rail such as the worksurface and cubby units for improved versatility. Guard rail also comes in metal, veneer, or a white board finish.

Climb to the top bed by using the built in ladder.

A hanging white board and tackable panel allow you to **express yourself** in your space.

The **smartly recycled** tray comes from the cutouts on the bed frame. It attaches for storage just where you need it.

The **seat to table** lounge stool gives multiple lounging options while keeping the same aesthetics of the bed furniture.

From **work to wardrobe**, add a hanging bar to the worksurface to double up as additional clothes hanging space.
