Features

Shared Features

Beech

Superb strength, exceptional grain consistency and superior color clarity make beech wood the best choice for commercial seating.

Construction

Mortise-and-tenon construction has been the hallmark of fine woodworking for centuries. We rely on this time-tested method for maximum joint strength.

Detail differences

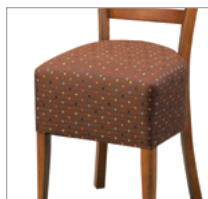

We glue, screw and “blind-bolt” back legs together using hardened nuts and bolts, then camouflage the connection with a matching grain plug. Corner blocks are glued and lagscrew-bolted at a mitred angle for exceptional strength and durability. Stretchers are toenail screwed to eliminate the need for unsightly metal brackets.

Variations Upholstery Program

The Variations Custom Upholstery program allows you to create endless upholstery treatment possibilities with our wood chairs.

aluminum

Our aluminum chairs are incredibly strong, lightweight and versatile.

Our aluminum chairs are incredibly strong, lightweight and versatile.

Features

Shared Features

Construction

Precision CNC-machinery and carefully engineered weld placement make our aluminum chairs incredibly strong and durable yet surprisingly lightweight.

Finish

Available in a classic brushed aluminum finish or a powder-coated paint.

Details

Working with aluminum takes as much skill and craft as woodworking. The attention to detail is evident in the graceful contours of our chairs and the invisible welds at joints.

Seat options

Seats are available in aluminum, upholstered or wood options. All-aluminum models are ideal for outdoor use.

tables

It's easy to find just the right table to compliment any setting. Our Orchestra Table Collection features a wide range of styles, materials and edge choices to choose from.

Tables | Orchestra Collection

It's easy to find just the right table to compliment any setting. Our Orchestra Table Collection features a wide range of styles, materials and edge choices to choose from.

Features

Construction

Our bases are made of high strength steel that is 30% stronger than the average steel. Raw steel table bases are cleaned, phosphate primed, powder-coat painted and oven-baked with auto-grade finishing materials.

Columns are heavy-wall tubes made of 14-gauge steel. Top plate is stamped high-strength steel. All connections are hard-welded using our state-of-the-art machinery and a deep penetration welding process that maximizes strength.

Labor Saver Attachment

Our top mounting plates and columns are unique to the industry. The mounting plate is hard-welded to the column. It attaches easily to our pre-driller table tops.

Optional Accessories

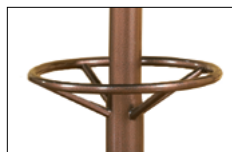

Fixed Pub Height Table

Most base heights can be increased. Standard dimension for Fixed Pub Height Table is 42" nominal with top. Please call for pricing.

Foot Rings (Pub Height)

19" diameter foot supports that are hard-welded to the vertical column. Available on most designs. Please call for pricing.

Purse Shelf

"Under-Top" option for accommodation of purses, coats, bags, etc. at bar tables. Each shelf has four storage hooks affixed to the bottom of the shelf. Standard size is 15" round; identical to top. Please call for pricing.

Self-Leveling Glides

A patented product that self-levels table bases on uneven floors. Please call for pricing

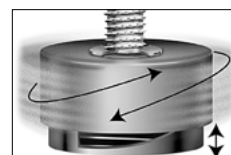

Table-Flip Mechanism

A heavy H.D. steel assembly that allows the table top to flip to a vertical position. Usually specified to accommodate table storage. Available on sizes up to 48".

Table-Fold Mechanism

Allows "T" bases to fold. Typically for storage purposes. Available on most non-cast iron products. Please call for pricing

Optional Accessories

Table Connectors

Used to join square and rectilinear tables together for reconfiguring space. Please call for pricing.
